CMDB CI/Asset Data
Complex relationships

simplifying **IT**

It is important to offer business users a "**simplified at-a-glance**" overview of relationships and interdependencies of their CI/Asset data.

e-Vis[tm] provides the full benefit of a federated configuration management database with the simplicity of drag & drop visual mapping. Enjoy unprecedented visability into your business infrastructure (and linked components) while providing an essential tool for assessing change, trouble-shooting and a vehicle for visualizing root-cause analysis.

Designed from the ground up to be a simplified, user-friendly environment with ease of use, **e-Vis**[tm] delivers unparalleled visibility into the enterprise IT infrastructure.

Graphical representations of asset infrastructure includes complex mapping of business required relationships.

We help our customers maximize business value utilizing our CMDB Technology, while at the same time minimizing operational risk.

As the CMDB is a key component of **ITIL**,[tm] so it is with our application integration.

e-Vis[tm]

CMDB Visualization means functional Business Intelligence on a new level.

IT solutions that work for your business.
